Safe Environment

Our aim is to provide excellence in service, offering unparalleled standards of care to our clients according to our accreditation standards.

- NHI is committed to Client and Employee safety. In a safe setting, a person has little risk of illness or injury. The person feels safe and secure physically and mentally.
- Awareness of surroundings; for example Paralysis- understanding clients who are paralyzed may not be able to move to safety and so it is important that NHI ensures the client's safety, health and wellness evaluating their basic body mechanics, moving and positioning.
- Vision- To be aware that Clients with poor vision are at risk for fall and can trip on items; can take the wrong medications, wrong doses, or poisons.
- Hearing- To be aware that hearing impaired person has problems smelling smoke or gas. They may have problems sensing heat or cold, and they can get burned.
- Falls: It is important that the caregiver be aware that Clients do fall and most of these falls occur in bedrooms. The risk of fall increase with age and most falls are in persons between the ages of 65 and 85. Most falls occur in the evening, also during shift changes if the client is in facility.
- Safety- it is important that the caregiver be aware of fire safety measure, disasters and workplace violence. It is also very important that the caregiver be fully aware of the risk management strategies.
- Care Plans- Our care plans list measures for the person's specific risk factors and the care plans are frequently re-assessed by our supervisors.
