Institutional Facility Staffing

As hospitals and healthcare facilities experience budget restraints, patients could be put at risk should there not be enough staff to provide care. Hiring too many permanent or regular part-time personnel can be expensive and when the patient census is down, those who are hired on the payroll must be paid.

Why choose NHI Health Care Staffing Agency?

NHI has the cost-effective solution to this healthcare facility human resources dilemma by providing temporary healthcare staffing services.

By contracting with NHI as your temporary services provider, you gain access to an Agency that has been providing services since 1985, accredited by Accreditation Canada, Consumers' Choice Award for Professional Nurse Service, Quality Health Network, Ontario Homecare Association and Better Business Bureau.

Our value-added services help you increase efficiencies and maintain the highest level of patient care no matter what the circumstance. We provide staffing solutions offered by our pre-screened registered nurses, registered practical nurses, personal support workers, observers, attendants and allied health professionals .

Here's how NHI can help you:

- Assist with meeting your short and long term staffing needs. We can have our front-line workers fulfill your temporary staffing needs, your unit might be experiencing fluctuation in patient census, there might be a special project undertaking, you might have staff off on sick leave, maternity leave, vacation leave, family leave or those sudden emergency situations.
- Strategically optimize your staffing. Recognizing that your needs vary throughout your facility, NHI will work with you using a strategic-customize approach to your staffing needs.
- Access to a vast supply of health care professionals. NHI has a large supply of nursing, personal support workers and allied health care professionals in our database that you can select from to meet your specific temporary and/or permanent needs. Let us help you with the right fit for your area whether it is for one shift or several shifts.
